Carlos:

Attached is our sampling plan. As I mentioned, it would be wise for BP to begin to initiate preparations of a comprehensive public health air monitoring plan and to also a water quality sampling plan. I say this because EPA is getting spun up about these issues and it is likely that we will be pushed to do this type of assessment activity for the anticipated 90 day time frame. I believe that it would be more cost effective for you guys to prepare an approved plan and implement. I think it would be wise for this to be brought up to your management and the Unified Command. EPA would be willing to work with you guys to develop an acceptable plan should the Unified Command agree.

Gary,

It was nice to meet you in person today. Attached is the Air Monitoring Plan for the incident. It was prepared by the Health & Safety unit, reviewed by the USCG and approved by the Incident Commander yesterday. As we discussed, it would be great if you can share your plan so we can see how they complement each other.

<<MC 252 Air Monitoring Plan.ZIP>>

I will be here at the Houma Unified Command thru Friday, so please let me know if you need anything from us.

Thanks,

Carlos J. Moreno
